

Hummingbird Resources plc / Ticker: HUM / Index: AIM / Sector: Mining

Hummingbird Resources plc (“Hummingbird” or “the Company”)

Ore Commissioning Commenced at Yanfolila

Hummingbird Resources (AIM: HUM) is pleased to announce that ore commissioning has commenced at the Yanfolila Gold Mine in Mali (“Yanfolila” or “the Project”).

Highlights:

- Introduction of ore to the mill and the carbon in leach (“CIL”) process plant from the run-of-mine (“ROM”) pad stockpile has commenced
- First gold production expected before the end of December
- Commercial ramp up during Q1 2018 with a target of delivering c.130,000 ounces of gold during the first full year of production

Dan Betts, CEO of Hummingbird, commented:

“Ore commissioning represents the final step ahead of first gold production at Yanfolila. Everybody on site is totally focused on a smooth ramp up of the plant as we look to move into the production phase. This is a key transitional moment for Hummingbird, transforming the Company from a developer to a producer. Our first year’s production is expected to be around 130,000oz of gold, which is projected to generate around US\$70m of free cash flow at a US\$1,250 gold price. I look forward to reporting news of our first gold pour in the very near future.”
